

ABOVE Science Cloud Webinar: System Updates and Q & A

October 21st, 2016

above.nasa.gov @NASA_ABoVE

Agenda

1. Changes to the Windows systems – Ben Bledsoe
2. NGA DigitalGlobe Data– Scott Sinno
3. Schedule for ArcGIS implementation – Jim Shute

Changes to Windows

- Reminder: ADAPT domain has been retired/migrated to ADC
- All users who were on the ADAPT domain and have not logged into ADC as of yet can find their temp password in a .txt file in their home directory (ngaloglein/dsclogin). Remember to use ADC\username
- Guacamole has gone public
 - <https://guac.nccs.nasa.gov>
 - Launchpad Sign In
 - Guacamole Sign In (same password as ngaloglein/dsclogin)
 - Windows Sign In
- FAQ for Windows Users on NCCS Website
 - https://www.nccs.nasa.gov/services/adapt/windows_faq
- If there are any users who are waiting on Windows access and did not receive the onboarding email, please contact Ben Bledsoe (ben.bledsoe@nasa.gov)

NGA DigitalGlobe Data

1. NGA DigitalGlobe Data Issues

- Moving the NGA volume (gluster to gpfs)
- NGA data unmounted from login nodes
- Reminder on use agreement

Demo:

Using the Windows VM to access NGA data

ArcGIS Implementation

- Public Portal
 - Similar to existing ArcGIS Online experience
 - Development environment (10/13/2016)
 - Production environment (11/15/2016)
- Private eGIS (ADAPT only)
 - Full Desktop / Server implementation
 - Development environment (12/30/2016)
 - Production environment (2/13/2017)

Esri 3-Tier Architecture

Public Portal

Private eGIS
